

# Exceptional service. High-quality products.

Wildcatter Companies are a leading ready-mix concrete and aggregate supplier for commercial and residential customers in North Texas. Wildcatter Companies was founded with the idea of putting customers first. Our mission and vision help guide our operations and ensure we go above and beyond to offer exceptional customer service and the highest quality products.

## Wildcatter Sand Services

### Washed Sand

#### Concrete Sand

Wildcatter's concrete sand is mainly used in producing concrete as the fine aggregate component in concrete. In addition, it can be used in certain filter applications and as granular backfill

#### Mason Sand

Wildcatter's masonry sand is a high-quality, washed material that is screened for imperfections. The fine texture of masonry sand makes it a great fit for masonry applications such as cement mixes, grout and mortar. It can also be used for recreational purposes, like playgrounds and volleyball courts.

#### Premix

Wildcatter offers premix sand and gravel, saving you the need to create your own. Our blend works well for mixing concrete for foundations but is easy to trowel over for a smooth finished look.

### Washed Rock

#### 1" Native Rock

Wildcatter offers a wide selection of washed 1" native rock for various construction and landscaping applications.

#### 1 ½" Native Rock

Wildcatter also offers 1½" native rock that can be used for landscaping or other construction projects.

#### 3/8" Pea Gravel

Pea gravel is used for roofing, walkways, driveways and rainage projects.

## Fill Materials

### Cushion Sand

Wildcatter offers cushion sand, which works well under concrete work or on building pads on construction projects.

### Select Fill

A mix of clay and sand, select fill material is often used underneath concrete foundations. We mix and compact our select fill to pass required testing for engineer specifications on building pads.

### Unwashed Rock

Wildcatter also offers various unwashed rock options to fit your construction project needs.

- Dirty Oversized Rock
- Crushed Base Rock

## Wildcatter Redi-Mix

If you need ready mix concrete for your project, Wildcatter Redi-Mix can help. Ready-mixed concrete is made up of cement, water, sand, and aggregates. The Wildcatter team produces each batch to meet our customer's specifications based on their construction project needs. We also handle the transportation and pouring at the customer's project site.

## Concrete Types

Our team handles both commercial and residential pours within our designated operating area. From standard pours to complex jobs, Wildcatter Redi-Mix will be your partner every step of the way.

### Standard Ready-Mixed Concrete

Most projects require standard ready-mixed concrete with strengths of up to 4,000 psi. This is our most popular product and works for a variety of commercial and residential applications.
